LESSON 8: N8N WORKFLOW MASTERY

#Automate 80% of Your Business Operations

#■ LESSON OBJECTIVES

By the end of this lesson, you will:

1. Have n8n installed and configured
2. Build 4 essential automation workflows
3. Connect Stripe, Google Sheets, Email, and Telegram
4. Automate client onboarding and lesson delivery
5. Save 5-10 hours/week on administrative tasks

#■ THE BIG IDEA

n8n (pronounced "n-eight-n") is free, open-source workflow automation that connects all your tools.

The Automation Math:

- Manual onboarding: 30 minutes/client × 10 clients = 5 hours
- Automated onboarding: 2 minutes/client × 10 clients = 20 minutes
- Time saved: 4 hours 40 minutes
- Value at \$100/hour: \$466 saved weekly

Your goal: Automate repetitive tasks so you can focus on growth.

#■ PART 1: N8N SETUP & BASICS

##Installation Options:

###Option 1: Local Installation (Recommended)

```bash

Windows (PowerShell)

npm install n8n -g

n8n start

Access at: <http://localhost:5678>

```

###Option 2: Cloud (n8n.cloud)

- Free tier: 1 workflow, limited executions
- Paid: \$20/month for unlimited
- Pros: No setup, always running
- Cons: Limited free tier, monthly cost

###Option 3: Docker

```bash

docker run -it --rm \

--name n8n \

-p 5678:5678 \

-v ~/.n8n:/home/node/.n8n \

n8nio/n8n

```

##Essential Nodes to Install:

1. Stripe Node (payments, customers)
2. Google Sheets Node (data storage)
3. Email Node (SMTP) (send emails)
4. Telegram Node (bot messages)
5. HTTP Request Node (API calls)
6. Schedule Trigger Node (automated runs)

##Exercise: Install n8n

Choose your installation method: ☒ Local ☐ Cloud ☐ Docker

Installation steps completed:

- [] n8n installed
- [] Accessible at <http://localhost:5678>
- [] Basic nodes available
- [] Test workflow created

Action: Install n8n now if not already installed.

#■ PART 2: WORKFLOW 1 - NEW CLIENT ONBOARDIN
