✧ Chapter 1: Why Audiobooks? (Faith, Ears, and Reaching the Masses)

Let's start with real talk: not everybody reads. Some folks can't sit through 40 pages if you bribed them with Chick-fil-A nuggets and a Netflix password. But everybody listens.

People listen to:

- Music (Drake, Taylor Swift, or Lecrae).
- Podcasts.
- TikToks on loop.
- Sermons in the car.

So if you want your eBook to actually spread, you've got to make it listenable. Enter: the audiobook.

The Faith Angle

📖 *Romans 10:17* — “Faith comes by hearing, and hearing by the Word of God.”

Notice that—hearing. Not scrolling. Not skimming. **Hearing.**

That’s why audiobooks are powerful: you’re putting the message directly into someone’s ears, where faith grows.

Why Young Adults Need Audiobooks

- **Attention spans are short.** Reading 40 pages? Pain. Listening while driving DoorDash? Easy.
- **Accessibility.** Some people struggle with reading, but everyone can hit play.
- **Virality.** Audiobook clips can be chopped into TikToks, IG reels, and even memes.

Celebrity Shoutouts

- **Drake:** You don’t read his lyrics—you *hear* them.
- **Steve Harvey:** His books are great, but his voice is what inspires millions.
- **Paul the Apostle:** His letters would’ve been viral on Spotify if he had AI. (Picture “Romans: The Audiobook” narrated from prison.)

Humor Break

Imagine if David's Psalms dropped today as an audiobook:

- “Now streaming: *Psalms: The Mixtape* 🎧🔥 Narrated by King David, with harp beats.”
- Spotify comments: “Bro, this slap harder than Drake's album.”

Challenge

Ask yourself: *Do I want my words stuck on a PDF file—or echoing in cars, headphones, and earbuds all around the world?*

If your answer is yes, then congrats—you're ready to step into the audiobook era.

2

✧ Chapter 2: Free vs. Paid — How to Leverage AI for \$0 (or Close to It)

Here's the good news: turning your eBook into an audiobook doesn't have to cost thousands of dollars. You don't need to rent a studio, pay a narrator \$300 an hour, or buy equipment that looks like it belongs to NASA.

You can start for **free** with AI.

Free AI Tools

1. **ElevenLabs (Free Tier):** AI voices so real you'll think Morgan Freeman just walked into your living room.
2. **Play.ht (Free Version):** Converts text into high-quality speech.
3. **Natural Readers:** Free browser-based text-to-speech with multiple voices.

1. **CapCut (Free App):** Mostly for video, but it can handle narration + simple edits.
2. **TTSM3.com:** Copy/paste your eBook text and download spoken MP3s instantly.

Low-Cost Options (Under \$20/month)

1. **Murf.ai:** Professional-level voices that sound like audio-books.
2. **Descript:** Not only records but edits your audio by editing text (like magic).
3. **Speechify Premium:** Famous influencers use it—low monthly cost, high-quality output.

Faith Principle

📖 *Luke 16:10 — “Whoever can be trusted with very little can also be trusted with much.”*

If you can steward free tools faithfully, God can expand your resources later. Don’t wait until you’re rich to start—start now with what’s free.

Humor Break

Stop saying you “can’t afford” to make an audiobook. You’ve bought \$10 Starbucks drinks, \$20 haircuts, and \$300 Jordans. But you can’t spend \$0 on a free AI tool? Make it make sense.

Pro Tip

Start free, upgrade later. Your first audiobook doesn’t have to sound like Marvel Studios produced it. It just needs to sound **clear, passionate, and real.**

3

✧ Chapter 3: Choosing the Right AI Voice (and Why Yours Still Matters)

So you've got your eBook and a free AI tool open. The next question is: *"Whose voice is gonna read this thing?"*

Do you use your own voice? Or an AI-generated one?

Let's break it down.

Option 1: Your Voice

Pros:

- Authentic. Nobody else has your tone.
- Emotional. You can laugh, pause, and add passion where it matters.
- Spiritual. God gave *you* that voice for a reason.

Cons:

- You might not like how you sound at first.
- Takes practice to get it smooth.

Option 2: AI Voice

Pros:

- Professional. Some AI voices sound like Morgan Freeman narrating the weather.
- Fast. Copy + paste, and boom, instant audiobook.
- Cheap. Many free versions are available.

Cons:

- May sound too “perfect” or robotic.
- Lacks your unique testimony vibe.

Blended Strategy

Here’s the hack: **Mix both.**

- Use your own voice for personal testimony chapters (like when you talk about faith, struggle, or breakthrough).
- Use AI voices for less personal sections (like step-by-step

instructions or lists).

That way, your audiobook feels both *real* and *polished*.

Celebrity Inspiration

- **Kevin Hart:** His audiobooks are funny because *he* narrates them.
- **Will Smith:** Narrated his autobiography himself—raw and powerful.
- **Morgan Freeman:** If you can afford him, congrats, you’ve made it. But until then, use AI Freeman for free.

Faith Principle

📖 *John 10:27* — “My sheep listen to my voice; I know them, and they follow me.”

There’s something powerful about your own voice. People who connect with you will recognize it and follow. Don’t underestimate it.

Humor Break

Don’t stress if your voice sounds weird to you. Everybody thinks their voicemail sounds like a dying robot. Even Beyoncé probably thought: “*Do I really sound like that?*” the first time she heard playback.

Exercise

1. Record 1 page of your book in your own voice.
2. Generate the same page with an AI voice.
3. Play them back. Decide if you want all-you, all-AI, or a hybrid.

That's your game plan.

4

✧ Chapter 4: Writing for the Ear — Turning Pages into Spoken Flow

Here's the truth: a book that's fun to *read* might be boring to *listen to*.

Why? Because the ear processes differently than the eye.

That means you've gotta **tweak your writing** so it *sounds* good when spoken out loud.

Rule #1: Keep It Conversational

Bad audiobook script:

"It is imperative to acknowledge that AI technology revolutionizes audiobook creation."

Good audiobook script:

"AI is changing the game. For real—it makes audiobooks simple, even if you're broke."

See the difference?

Rule #2: Use Rhythm and Repetition

Jesus did this all the time: “*Verily, verily...*” Repetition sticks in the ear.

Example:

- “Faith builds you up. Faith keeps you steady. Faith carries you through.”

That’s way more powerful in audio.

Rule #3: Ask Questions

Pull the listener in:

- “You ever been broke, but still smiling? That’s faith.”
- “Ever wonder why God gave you a voice? Maybe it’s time to use it.”

Questions keep ears hooked.

Rule #4: Add Pauses

AI voices can pause. You should too. A pause adds drama.

Example:

- “I was broke... But God wasn’t.”

Humor Break

Imagine if TikTok captions were read in audiobook style:

- *“Sheeeeeesshhh—chapter 5 about to hit.”*
- Or: *“Bruh... no cap, this story wild.”*

That’s the vibe—make it sound like your audience’s world, not a college lecture.

Celebrity Inspiration

- **Eric Thomas (Hip-Hop Preacher):** Uses rhythm + passion.
- **Sarah Jakes Roberts:** Talks like your big sis, but hits with truth.
- **Denzel Washington:** Short sentences, big impact.

Faith Principle

📖 *Mark 4:9 — “Whoever has ears to hear, let them hear.”*

Jesus didn’t just say things—He said them in a way people *heard* and remembered. That’s your job with your audiobook.

Exercise

Pick 1 page of your eBook. Rewrite it as if you’re explaining it to your best friend who’s late on rent. Record both versions. Which one sounds smoother? That’s your audiobook version.

5

✧ Chapter 5: Recording with AI — Free Tools That Work (Even If You're Broke)

Here's the part where most people freeze up: *"How do I actually record this thing?"*

Spoiler alert: it's not hard. In fact, with AI, it's easier than heating up a Hot Pocket.

Free Recording Options

1. **Voice Memos (iPhone) / Recorder App (Android):** Yup. Your phone. Hit record, speak, done.
 2. **Audacity (Free on Windows/Mac):** OG software for recording + editing. Simple but powerful.
 3. **GarageBand (Free on Mac/iOS):** Musicians use it, but it works perfectly for audiobooks too.
-
1. **TTSMF3.com (Free Website):** Paste your text → choose a

voice → download MP3. Boom.

2. **Natural Readers (Free Version):** Upload your eBook text, select a voice, and export audio.

Step-by-Step: Turning Text into AI Audio

1. **Copy & Paste:** Grab one chapter from your eBook.
2. **Choose a Voice:** Pick male/female, casual/professional (don't pick "robot mode").
3. **Adjust Speed/Pitch:** Make it sound natural (not too fast, not too slow).
4. **Download File:** Save it as an MP3 or WAV.
5. **Repeat for Each Chapter.**

Now you've got audio files for your whole book.

Hybrid Hack

If you want it to feel *extra real*:

- Record your intro + testimony chapters in **your own voice** (raw + authentic).
- Use AI to handle the "info-heavy" parts (clean + consistent).

It's like a feature album—you and AI collabing like Drake and Future.

Faith Principle

📖 *Matthew 25:23* — “You have been faithful with a few things; I will put you in charge of many things.”

If you can be faithful with free AI tools, God can bless you with a studio later. Don’t wait until it’s perfect. Start with what you have.

Humor Break

Imagine Paul in 2025:

- “Instead of hand-writing letters, I just dropped Romans on Spotify. Stream it y’all.”
- Timothy: “Bet, Apostle, I’ll share to my story.”

Exercise

Go to Natural Readers or TTSMP3.com. Paste 1 page of your book. Pick a voice. Play it back. That’s the sound of your future audiobook—free.

6

✧ Chapter 6: Adding the Faith Factor — Scripture, Testimony, and Audio Presence

Okay, so now you've got an audiobook. But here's the thing: it can't just be words. If you want your audiobook to last, it needs the **Faith Factor**.

This is what makes your project different from just another AI-narrated manual on "10 Ways to Organize Your Closet."

The Faith Factor = 3 Elements

1. **Scripture:** Tie your chapters back to God's Word.
 - Example: Teaching about perseverance? Drop *Galatians 6:9*.
 - Talking about provision? Slide in *Philippians 4:19*.

1. **Testimony:** Tell your story. Nobody can argue with your testimony.
 - Example: “I once prayed with \$5 in my account, and God still came through.”
1. **Audio Presence:** Pray before you record. Even AI voices can’t replace the Spirit flowing through you when you speak.

Why It Matters

📖 *Isaiah 55:11* — “My word... will not return to me empty, but will accomplish what I desire.”

When your audiobook carries God’s Word, it carries power. You’re not just producing content—you’re planting seeds.

How to Add Faith Into AI Audio

- **Mix AI with You.** Let AI handle the bulk, but record your **faith moments** yourself.
- **Add scripture as background whispers.** (Yes, AI can generate “second voices” softly reading verses behind narration.)
- **Open or close each chapter with prayer.** Simple 10–20 seconds: “Lord, bless the listener...”

Humor Break

Imagine if Netflix dropped “The Bible: The Audiobook” narrated by Denzel Washington. You’d binge every chapter, no skips.

That’s the vibe you’re aiming for—faithful, powerful, unforgettable.

Celeb Inspiration

- **Lecrae:** Mixes scripture + testimony in music, reaches millions.
- **Mike Todd:** Pours faith + humor into every message—perfect audiobook energy.
- **Steve Harvey:** Talks about faith openly in his shows, people connect because it’s real.

Exercise

Pick one section of your eBook. Add:

- 1 scripture.
- 1 personal story.
- 1 prayer sentence.

Now imagine hearing that in your audiobook. Feel the difference? That's the **Faith Factor**.

7

✧ Chapter 7: Editing Your Audiobook Like a Pro (Without Expensive Software)

Okay, so you've recorded your audiobook. But here's the problem: raw audio is like raw chicken. You *can't serve it as is*. It needs seasoning, cleaning, and a little heat. That's where **editing** comes in.

Don't panic. Editing doesn't mean you need a \$500 studio engineer. You can edit for **free** or **super cheap** with AI and simple software.

Free & Low-Cost Editing Tools

1. **Audacity (Free):** Old school, reliable, works on Mac + PC. Trim, cut, clean background noise.
2. **GarageBand (Free on Mac/iOS):** Easy drag-and-drop editing. Add music, adjust volume.

1. **Descript (Free plan + paid upgrade):** Edit audio *by editing text*. Delete words from the script, they vanish from the recording. (It feels like cheating—it's that good.)
2. **CapCut (Free):** TikTok editors use it. Also great for syncing audio + visuals if you want promos.
3. **Krisp (Free basic plan):** AI that removes background noise like dogs barking or little siblings screaming.

The Editing Checklist

1. **Remove Mistakes:** Cut out coughs, repeats, or awkward pauses.
2. **Balance Volume:** Make sure your voice is steady (not whispering one minute, yelling the next).

1. **Kill Background Noise:** Use AI tools like Krisp.

1. **Polish with Compression:** Fancy word = keeps audio levels consistent. Audacity has this built in.
2. **Save in High Quality:** Always export as WAV or 320kbps MP3 for that crisp sound.

Humor Break

Editing is like dating. You start with excitement, then realize: “Wow, this needs a LOT of fixing.” But once you clean it up, it’s worth it.

Faith Principle

📖 *1 Corinthians 14:40* — “Let all things be done decently and in order.”

Editing = order. You’re not just cutting noise—you’re presenting your audiobook in a way that honors God and respects the listener’s time.

Pro Hack

If editing overwhelms you, remember: done > perfect. God can use your imperfect audiobook to bless someone. Don’t get stuck chasing flawless.

Exercise

Download Audacity. Import 1 minute of your recorded audio. Play with trimming, noise reduction, and volume. Save it. Congrats—you just became an editor.

8

✧ Chapter 8: Music, Sound, and Vibes — Enhancing Without Overdoing

Now let's talk spice. Music and sound effects can make your audiobook pop—but too much and it'll sound like a chaotic TikTok remix.

The key is balance.

Why Add Music?

- **Set the Tone:** Soft piano = reflective. Hip-hop beat = motivational.
- **Engage Attention:** Background vibes keep listeners locked in.
- **Make It Viral:** Clips with music share better on IG/TikTok.

Free Music Resources

1. **YouTube Audio Library (Free):** Tons of royalty-free tracks.
2. **Pixabay Music (Free):** Safe, no copyright issues.
3. **Epidemic Sound (Low-cost):** Huge library, free trial available.
4. **Bensound (Free w/credit):** Great for inspirational tracks.

How to Use Music in Audiobooks

- **Intro/Outro:** Add a short theme song at start and end.
- **Transitions:** Soft beats when switching chapters.
- **Background:** Keep it low. Your voice is the main event.

Sound Effects (Use Sparingly)

Example ideas:

- A page flip sound at chapter openings.
- Subtle “Amen” crowd sound (for humor).
- Nature sounds for calm reflection.

But don’t overdo it. You’re not making a Marvel movie.

Humor Break

Imagine Paul’s audiobook with sound effects:

- “*Shipwrecked...*” (waves crashing 🌊)
- “*...then bitten by a snake.*” (hissssss 🐍)
- Paul: “Bruh, really?”

Funny once. Annoying after 10 minutes. Keep it classy.

Faith Principle

📖 *Psalm 150:4* — “Praise Him with timbrel and dancing; praise Him with strings and pipe.”

Music enhances worship. It can also enhance your audiobook—when used wisely.

Pro Hack

Pick **one theme track** that matches your book's vibe. Use it for intro, outro, and light transitions. Consistency = branding.

Exercise

Download 1 free instrumental track. Import it into Audacity or GarageBand. Fade it under your voice for the intro. Listen back. That's professional audiobook energy—on a \$0 budget.

✧ Chapter 9: Exporting and Formatting (How to Go from File to Finished Product)

So you've recorded, edited, maybe added a little background music, and now you're ready to let your audiobook fly. But before you hit "upload," you've got to **format it right**.

Think of it like getting dressed for church—you don't just roll in with pajama pants. You present yourself decently and in order. Same with your audiobook files.

Step 1: Export Your Audio

- **WAV Format:** Highest quality, but big file size.
- **MP3 Format:** Still solid, smaller size, easier to upload.

Pro tip: Always export a high-quality WAV copy for safekeeping, then create MP3s for distribution.

Step 2: Split Into Chapters

Nobody wants a 4-hour file with no breaks. Break your audio-book into **separate chapter files**.

- Example: Chapter1.mp3, Chapter2.mp3, etc.
- This makes it easier for listeners to pause and come back.

Step 3: Add Metadata

Metadata = the little details attached to your audio files.

- Title
- Author
- Chapter #
- Year
- Cover Art

Free tool: **MP3Tag** (Windows) or **Kid3** (Mac/Linux). Add your info so your audiobook looks official.

Step 4: Cover Art

Audiobooks need covers too. Use Canva (free).

- Dimensions: 2400 x 2400 pixels.
- Make it bold, simple, scroll-stopping.
- Remember: If it doesn't look viral enough for Instagram, redo it.

Humor Break

Exporting your files right is like cooking spaghetti. Without the colander (formatting), it's just a mess dripping all over the place. Clean it up before you serve it.

Faith Principle

📖 *Colossians 3:23* — “*Whatever you do, work at it with all your heart, as working for the Lord.*”

That includes exporting MP3s. Excellence honors God—even in the little details.

Exercise

Export one chapter of your eBook into MP3 format. Add a title, author, and cover art with MP3Tag. Now play it on your phone. You just made your first official audiobook track.

10

✧ Chapter 10: Distribution — From YouTube to Audible (and Why Free Uploads Matter)

Now that your audiobook is packaged, it's time to **release it into the wild**. Distribution is where your project moves from “my laptop” to “the world.”

The best part? Most of this can be done **for free**.

Free Distribution Options

1. **YouTube:** Upload your audiobook as a playlist (chapter by chapter). Add cover art visuals. Free exposure, global audience.
2. **SoundCloud (Free tier):** Good for sharing shorter books or promo clips.
3. **Anchor.fm (Spotify for Podcasters):** Upload as podcast episodes—Spotify & Apple Podcasts for free.

4. **Google Drive/Dropbox Links:** For free giveaways or limited releases.
5. **TikTok/Instagram Reels:** Chop up short clips (30–60 seconds) for promo.

Paid/Pro Options (Worth It Later)

1. **Audible via ACX (Amazon's platform):** Gold standard for audiobooks.
 - They require higher quality (WAV files, strict formatting).
1. **Findaway Voices:** Distributes to Apple Books, Spotify, and 40+ other stores.

Start free. Scale later.

Faith Principle

📖 *Matthew 28:19 — “Go and make disciples of all nations...”*

That's what distribution is: sending your message out beyond your neighborhood, city, even country. AI + free tools = worldwide reach.

Humor Break

Imagine Paul on Anchor.fm:

- Podcast Title: *Letters with Paul*
- Episode 1: “Dear Corinthians (Part 1)”
- Episode 2: “Romans Unfiltered”

He’d go viral overnight. You can too.

Step-by-Step Free Release Plan

1. Upload each chapter to YouTube (playlist style).
2. Upload audio-only to Spotify (via Anchor.fm).
3. Share teaser clips on TikTok/IG.
4. Drop links in your bio.
5. Ask friends/followers to repost.

Pro Hack

Use **QR codes** (free from Canva). Put them on flyers, church handouts, or IG posts. When people scan, it goes straight to your audiobook. Viral + practical.

Exercise

Upload your first finished chapter to YouTube with a cover art background. Share the link with one friend. Congrats—you've officially *distributed* your audiobook.

11

✧ Chapter 11: Marketing Like Kanye, Preaching Like T.D. Jakes

Alright, fam—you've written, recorded, edited, and exported your audiobook. It's live. But here's the truth: if nobody hears it, it's like dropping the hottest mixtape in the world... in an empty basement.

That's where **marketing** comes in.

Step 1: Build Hype Before the Drop

Think Kanye-level energy. When Kanye (or Ye, depending on the week) drops something, the whole world knows. That's the energy you need:

- Post countdowns on IG: "3 days until my audiobook drops..."
- Share behind-the-scenes clips of you recording.
- Tease quotes like Drake teases lyrics.

Step 2: Social Media Is Your Stage

- **TikTok/Reels:** Post short clips with captions. Example: “This 30-second clip changed my life.”
- **IG Stories:** Share testimonials.
- **Twitter/X:** Drop tweetable one-liners from your audiobook.

Step 3: Think Like T.D. Jakes

When Bishop Jakes preaches, it’s not just words—it’s presence. He *markets* faith by embodying it.

- Don’t just say, “Listen to my audiobook.”
- Say, “This audiobook is for anyone who feels broken, lost, or ready to level up.”

Sell the *transformation*, not the file.

Step 4: Collab Like a Rap Album

Drake doesn’t do albums without features. Neither should you.

- Collab with local pastors, influencers, or friends.
- Get them to share clips of your audiobook.
- Offer them free copies to review.

Faith Principle

📖 *Matthew 5:14* — “You are the light of the world. A city on a hill cannot be hidden.”

Don't hide your audiobook. Marketing isn't bragging—it's shining the light God gave you.

Humor Break

Imagine if Paul dropped his audiobook without marketing:

- Title: *Romans: The Audiobook*
- Release day: no posts, no promo, no flyers.
- Result: Timothy's mom is the only download.

Don't be Paul-without-marketing. Be Paul-with-billboards.

Exercise

Write 3 “hooks” for your audiobook right now:

1. “This audiobook is for anyone who feels broke but still believes.”
2. “If you've ever prayed, ‘God, help me,’ this is for you.”
3. “Faith. Struggle. Hustle. My story in your headphones.”

🔧 Conclusion & Call-to-Action

You did it. You took a simple 40-page eBook and turned it into something that lives in people's ears, cars, headphones, and hearts.

Let's recap your journey:

1. You discovered *why* audiobooks matter.
2. You leveraged **free + low-cost AI tools** to record.
3. You edited, added music, and exported files like a pro.
4. You distributed on free platforms like YouTube & Spotify.
5. You marketed like Kanye and preached like T.D. Jakes.
6. You built legacy—something bigger than yourself.

The Challenge

Don't stop here.

- **Step 1:** Pick one chapter of your eBook.
- **Step 2:** Paste it into a free AI tool (like Natural Readers).
- **Step 3:** Export the audio.
- **Step 4:** Upload it to YouTube or Spotify TODAY.

That's it—you're officially an audiobook creator.

Final Word

📖 *Habakkuk 2:2* — “Write the vision and make it plain, so that he may run who reads it.”

But in 2025, it's not just about who *reads* it. It's about who

hears it.

Your vision deserves to be heard. So hit record, hit upload, and let your voice echo across the world.

12

✧ Chapter 12: Legacy — Your Voice Echoing After You're Gone

Here's the truth: audiobooks aren't just content—they're **legacy**.

When you record your voice, you're leaving something people can hear even after you're gone. That's powerful.

Why Legacy Matters

- Your words could inspire someone years from now.
- Your testimony could stop someone from giving up.
- Your audiobook could reach people you'll never meet in person.

The Eternal Angle

📖 *Revelation 12:11 — “They overcame by the blood of the Lamb and the word of their testimony.”*

Your audiobook isn't just a hustle—it's a weapon. A testimony weapon. It carries your voice, your faith, your story—far beyond your lifetime.

Planting Seeds

Every time someone listens, you're planting a seed of hope. And seeds grow. Even if you never see the harvest, God does.

Humor Break

Picture this: 50 years from now, some kid stumbles across your audiobook on Spotify and says, “Who is this old-school guy named Terrance Gee?” Next thing you know, they're inspired, start hustling, and change their family's future.

Legacy.

Closing This Chapter

You didn't just make an audiobook. You built something eternal. Something your kids, grandkids, and strangers across the globe can hear and be blessed by.

Conclusion & Call-to-Action

You did it. You took a simple 40-page eBook and turned it into something that lives in people's ears, cars, headphones, and hearts.

Let's recap your journey:

1. You discovered *why* audiobooks matter.
2. You leveraged **free + low-cost AI tools** to record.
3. You edited, added music, and exported files like a pro.
4. You distributed on free platforms like YouTube & Spotify.
5. You marketed like Kanye and preached like T.D. Jakes.
6. You built legacy—something bigger than yourself.

The Challenge

Don't stop here.

- **Step 1:** Pick one chapter of your eBook.
- **Step 2:** Paste it into a free AI tool (like Natural Readers).
- **Step 3:** Export the audio.
- **Step 4:** Upload it to YouTube or Spotify TODAY.

That's it—you're officially an audiobook creator.

Final Word

📖 *Habakkuk 2:2 — “Write the vision and make it plain, so that he may run who reads it.”*

But in 2025, it's not just about who *reads* it. It's about who *hears* it.

Your vision deserves to be heard. So hit record, hit upload, and let your voice echo across the world.

Conclusion & Call-to-Action

You did it. You took a simple 40-page eBook and turned it into something that lives in people's ears, cars, headphones, and hearts.

Let's recap your journey:

1. You discovered *why* audiobooks matter.
2. You leveraged **free + low-cost AI tools** to record.
