

Lesson 11: Email Sequence Automation

AI Automation Mastery • March 29, 2026

LESSON 11: EMAIL SEQUENCE AUTOMATION

#Automated Onboarding, Lessons, and Support at Scale

#■ LESSON OBJECTIVES

By the end of this lesson, you will:

1. Have complete email sequences for student onboarding
2. Automate daily lesson delivery via email
3. Set up support and nurture sequences
4. Implement tracking and optimization systems
5. Handle 100+ students with personalized communication

#■ THE BIG IDEA

Automated email sequences deliver personalized content at scale, making each student feel individually supported.

The Email Automation Math:

- Manual emails: $10 \text{ minutes/student} \times 100 \text{ students} = 16.7 \text{ hours}$
- Automated sequences: $0 \text{ minutes/student} \times 100 \text{ students} = 0 \text{ hours}$
- Time saved: 16.7 hours weekly
- Value at \$100/hour: \$1,670 saved weekly

Your goal: Create "set and forget" email systems that nurture students from enrollment to success.
