

Lesson 10: Video Production Pipeline

AI Automation Mastery • March 29, 2026

LESSON 10: VIDEO PRODUCTION PIPELINE

#Automated Video Creation for Course Content

#■ LESSON OBJECTIVES

By the end of this lesson, you will:

1. Have a complete automated video production pipeline
2. Create videos from scripts in minutes (not hours)
3. Use FFmpeg for batch video processing
4. Integrate AI voice synthesis and stock footage
5. Produce professional course videos at scale

#■ THE BIG IDEA

Automated video creation turns text scripts into professional videos in minutes.

The Video Production Math:

- Manual video creation: $4 \text{ hours/video} \times 12 \text{ videos} = 48 \text{ hours}$
- Automated pipeline: $15 \text{ minutes/video} \times 12 \text{ videos} = 3 \text{ hours}$
- Time saved: 45 hours
- Value at \$100/hour: \$4,500 saved per course

Your goal: Create unlimited video content with minimal time investment.

#■ PART 1: PIPELINE ARCHITECTURE

##The Complete Automated Pipeline:
